- Hispanic/Latino 40%
- African American 5%
- Native American 4%
- Asian, Pacific Islander or other 6%

Challenge

Primavera Online School seeks to provide students with engaging career education coursework that supports their mission of inspiring students to reach their full potential through innovative and customized learning.

Solution

An 18-week pilot consisting of three 6-week sessions to gather student feedback. Registration for select courses (Robotics: Applications and Careers, and Esports and the History of Gaming) was open to all Primavera students who choose CTE eCourses as an elective offering. Students selected courses independently and/or worked with a guidance or enrollment counselor to determine if these courses were in line with their goals.

Outcome

A total of 334 students participated in the Pilot that Primavera Online School offered during the Spring 2020 term. Students taking an end-of-course survey rated, on average, CTE eCourses a 4.35 on a 5-point scale.

Survey Results

Student End of Course Survey

Strongly Agree 5	Course Name	1. I thought the class was interesting	2. I learned a lot in this class	3. This class was well organized	4. I knew what was expected of me in this class
Agree 4	eSports	4.4	4.3	4.4	4.4
